

# NTC Temperature Sensors

## Datasheet

### Functions

Due to their small design, NTC temperature sensors have a very low response time. They are used to measure the temperature in special applications in research and industry. A good fingertip feeling is necessary for handling.

### Key Features

- ✓ NTC...negative temperature coefficient
- ✓ Outer material: glass-encapsulated
- ✓ High measurement accuracy
- ✓ Very low response time

Name / Order Number: BAT -	TS-N250
Type of sensor	NTC
Measurement range [°C]	-55...250
Dimensions of the sensors [mm]	Ø0.8x1.4
Outer material	glass-encapsulated
Wire length [mm]	65
Response time [s]	<1
Connection type	2 wire
